be2sio4@stu.pku.edu.cn

Research interests

My research is in geometric group theory. I study group actions exhibiting non-positive curvature phenomena, with particular interests in growth, random walks, and geometric infiniteness.

Education

- | | |
|----------------|--|
| 2023 – Present | Peking University – Beijing, China
PhD in Basic Mathematics
Mentor: Wenyuan Yang. |
| 2019 – 2023 | Nankai University – Tianjin, China
BA in Mathematics (Poling class) |

Publications

[1] Chaodong Yang. Characterizations of Geometrically Infinite Convergence Group Actions and Orbit Uniform Metrics. arXiv:2608.05311, 2026.

Invited Talks and Seminars

2026-04, Geometric Infiniteness in Gromov Hyperbolic Spaces, Seminar, Chern Institute of Mathematics, Nankai University.

2026-03, Geometric Infiniteness in Gromov Hyperbolic Spaces, Geometry and Topology Seminar, School of Mathematical Sciences, Peking University.
